DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Double Patenting

2. Claims 1-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,723,971. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim the same structure elements of the invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 15, 24 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Kidd et al (3,316,344).

Kidd teaches a system and method for de-icing a surface of a cable 18, comprising an electrical conductor 16,17 proximate to the surface 18 in a range from 0 to 30 cm, an AC power source for providing a high-frequency AC voltage at 60 Hz in the electrical

conductor 16,17 that generated alternating electric field at the surface of the cable 18 (col. 1, lines 10-35).

Response to Arguments

5. Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.
